New in October 2026

Updates

- The updated Roof Outline design mode, with automated roof detection, is now available on Easy PV Ireland.
- Updated the Renusol hanger bolt options for fibre cement and sheet metal roofs. Steel purlin roofs now use the 150mm hanger bolt only.
- Updated the Fastensol MCS012 data to their latest MCS certificate (MR 50735501).
- Improved how SolShare handles incompatible hybrid inverters and batteries.
- AC isolators, DC isolators, and meters now link to their own help page from the component editor.
- Team management now shows the date each team was created.

Fixes

- Corrected Solfit parts lists to stop over-speccing on multi-roof installs.
- Fixed Solfit bottom flashing options not selecting.
- Fixed optimiser selection for SolarEdge inputs in the Inverter task.
- Fixed hybrid inverters not showing their charge rate and efficiency in the Inverter task.
- Fixed the “switching 2 strings in parallel” option disappearing after choosing a 2-pole DC isolator.
- Whole System Design now explains when a roof is missing an orientation, instead of showing an error.
