Can I pay Easy PV to design a project for me?

No, this is not a service we offer at Easy PV, but if you're struggling to use the software, you can always come to one or more of our free training sessions!

How do I link my Midsummer Account to pull over my trade prices?

To link your Midsummer wholesale account, please follow this [guide](#).

If you do not yet have a Midsummer wholesale account, you can sign up [here](#).

Can I do a retrofit project in Easy PV?

Yes, to create a quote for a retrofit project:

1. Recreate the existing system in Easy PV with the new additions.
2. Set the price of all existing components to £0 in the financial task.

If you need to create custom components to recreate the existing system, you can use our detailed component guide.

Can I do commercial or industrial designs in Easy PV?

Yes, you can use Easy PV for both commercial and domestic projects. Some features that will help with the accuracy and speed of commercial designs include:

- Automatic panel stringing
- Choice of a range of commercial consumption profiles or upload your customer's meter data directly.
- Support for setting export limits and viewing inverter and export clipping in charts.

More details on these features can be found in our performance and consumption task guides.

Can I do a battery-only project?

At the moment, this is not yet a supported feature. However, if you would like to quote a battery only project in the format then you can create a project that has only the quote by following these steps:

1. Create quick roof project
2. Skip through roof task (no need to change anything)
3. Open financial task and fill in quote
4. Generate proposal

This proposal will contain only the quote.
