

# Can I do a battery-only project?

At the moment, this is not yet a supported feature. However, if you would like to quote a battery only project in the format then you can create a project that has only the quote by following these steps:

1. Create quick roof project
2. Skip through roof task (no need to change anything)
3. Open financial task and fill in quote
4. Generate proposal

This proposal will contain only the quote.
