

Can I do commercial or industrial designs in Easy PV?

Yes, you can use Easy PV for both commercial and domestic projects. Some features that will help with the accuracy and speed of commercial designs include:

- Automatic panel stringing
- Choice of a range of commercial consumption profiles or upload your customer's meter data directly.
- Support for setting export limits and viewing inverter and export clipping in charts.

More details on these features can be found in our [performance](#) and [consumption](#) task guides.
