

How can I share components with other people in my pro team?

1. Navigate to *My Components*

2. Select the component type and component you want to share
3. Click on the share icon (three dots connected by two lines)
4. Selected the permissions you'd like to give
5. Click save

For inverters and solar panels, you will need to make sure you save both the manufacturer and the individual components.

Example manufacturer

Name:

Description:

Type: ▼

Not used in any projects

Example inverter

Not used in any projects

[+] Add inverter
