What's happened to the international site?

> As of **September 2025**, the Easy PV International site (easy-pv.com) will not be available. We’re working on a full upgrade of the International site, and we expect it to be back online within a few months. We’ll notify users as soon as it’s live.

Why is the site not available?

Over the past few years, our UK and Irish versions of Easy PV have seen major upgrades – introducing features like Pro accounts, faster performance, and tools such as automated roof scanning and Speedy PV lead generation. These improvements have made them significantly more powerful and reliable.

Unfortunately, the International site has fallen behind and is built on older infrastructure that’s increasingly difficult to maintain. Rather than patching it, we’ve decided to rebuild it properly so it can offer the same high-quality experience as our other platforms.

As a result of this, the Easy PV International site (easy-pv.com) will no longer be available from September 2025. We’re working on a full upgrade of the International site, and we expect it to be back online within a few months. We’ll notify users as soon as it’s live.

Can I still use Easy PV in the meantime?

You’re welcome to create a free account and use either the UK or Irish sites. Both function reasonably well for international users, although some features may not work (like roof scanning) and some of the calculated generation and consumption data may not be accurate for use outside the UK and Ireland.

I have important project data stored in my Easy PV account, can you help me access this?

Please reach out to our support team and we'll try and help get you access to relevant data and/or documents from your projects.

Need more help?

If you have any other questions or need assistance, feel free to contact us at help@easy-pv.co.uk.
