

Why is my date in the wrong format?

This is set by your browser settings, which may be set to English (US), giving the American date format (MM/DD/YYYY). Change this first in your browser settings, then reboot your browser (easiest way is to turn your computer off and on again).

Once you have the correct date format, subsequently created projects will display it correctly. You can update existing projects by refreshing the Customer Proposal before generating it:

The screenshot shows a web application interface with a dark navigation bar at the top containing the following menu items: Projects, Tasks, Components, Forms, Reports, and Help. The main content area is divided into several sections:

- Cover Page**: Includes a checkbox for "Customise introduction text".
- Smart Export guarantee**: Includes a checked checkbox for "Will the system be MCS accredited and eligible for SEG payments?" and a checkbox for "Customise Smart Export Guarantee text".
- Quotation**: Includes input fields for "Quote reference" (containing "1517672") and "Quote validity" (containing "30 days").
- Pricing**: Partially visible at the bottom.

On the right side, there is a sidebar with a "Project Overview" link and a "Customer Proposal" link. A red arrow points from the "Customer Proposal" link to the "Smart Export guarantee" section. The "Customer Proposal" section contains the following text:

Use this form to customise the c document.
Please note that customer prop and there are a few features tha We haven't yet added support fi you might have entered in the fi diagrams for optimised and micr yet fully working.
You need to have completed the view the proposal document:

- Panels
- Inverter
- Electrical
- Performance
- Either the 'MCS self consu performance task, or the C
- Financial

We'd welcome feedback on the help@easy-pv.co.uk.
