

New in April 2026

Updates

- GSE landscape added for slate, plain tile and concrete tile roofs.
- Changed battery management warning in proposal so it displays as optional.
- Upgrading to Pro info now displays all features and new navigation bar logo for active Pro users.
- Q1 OFGEM price cap site level tariffs added for all users to select from.
- Semi-rigid bottom flashing added for portrait GSE.
- Compatibility warning given when selecting multiple inverters.

Fixes

- Fixed issue with detecting non-default AC isolator.
- Pitch of panels now factored into PVGIS profile in Consumption task.
- Footer image warning now not displayed when e-signing.
- Fixed discrepancies in Solarport BOM.
- Fixed bug that allowed you to string across roofs with different pitch or orientation without optimisers.
- Fixed how much flashing was specced for Solfit panels.
- Fixed bug where removing panels from a roof breaks the structural calculations.
- Deselected finance partner options now no longer displayed.
- Fixed formatting errors in order form.
- Removed MCS mention on 'Your Energy Explained' for PVGIS and NREL projects.

Revision #2
