

New in August 2026

Updates

- Added an updated component editor for [custom meters and isolators](#).
- Added note to Alpha ESS installers
 - If you are planning your first Alpha ESS install you need to contact Alpha before the installation to be on-boarded and issued an installer license number which you will need in order to commission a system. Alpha will also be able to provide guidance and technical support to assist with your first installation: <https://www.alpha-ess.co.uk/become-approved-installer>
- Fastensol mounting has been reinstated on Easy PV now that it has an MCS certificate.
- The email notifying you when a document has been e-signed now directly links to the relevant project.

Fixes

- Correction to how Solarport systems are specced.
- Missing images in the proposal are skipped instead of preventing the PDF from downloading.
- Fixed an issue that prevented the Financial task and Customer proposal from loading due to a missing panel pitch and orientation.
- Fix to automatic shade analysis, providing more realistic performance projections.

Revision #3
