

New in July 2026

Updates

- Updated user interface of the [project and component sharing modals](#).
- Updated K2 wind uplift values in structural task inline with [MCS BBA 7466](#).
- Clearer wording on the proposal when a [grant](#) is applied.
 - Ensures when a grant is 'claimed afterwards' the correct effective cost is shown to the customer and the amount due to the installer remains accurate.
- Improvements to the task modal designs to support mobile viewing.

Fixes

- Fixed some discrepancies between Easy PV and Solarport components.
- Fixed appearance of Solarport systems in 3D view.
- Improved the accuracy of the 3D model shading which was off by approximately 1 hour during summer (BST).
- Fixed an issue where changing the DC isolators wasn't carrying through to the next stage.
- Cloned roofs in roof outline mode are ignored in the overview image.

Revision #13
