

New in August 2024

Numerous small updates and enhancements have been rolled to the live site. This includes:

- Retirement of an older version of the PV Array Test Report which has been replaced with a new PV Array Test Report that is up-to-date with MCS documentation
- The addition of a new GSE frame allowing for GSE projects with even more panel sizes
- Updates to structural task
 - Allowing for structural calculations if the roof is less than 5 m tall or is not an integer
 - Adding in of MCS certificate for a roof hook

Revision #3
