

New in July 2024

Lots of small updates and enhancements have been released. This includes:

- Updates to 3D design mode
 - Improved controls for land boundaries in the 3D design studio
 - Improvements to snapping guides
 - Ability to set the ridge to gutter distance via the elevations view
- Support for displaying a 3D design preview in the customer proposal document - you can manage this via the Customer Proposal task.
- Updates to data used for structural calculations based on BRE Digest 489 (2014 revised)
- Updates to quick roof design mode
 - Ability to clone a roof
 - Improvements to snapping guides

Revision #3
